WOMANKIND WELCOMES BACK CO-FOUNDER!

WomanKind is pleased to welcome back to our practice Advanced Registered Nurse Practitioner Renee Grier. Together with local midwife Gazelle Lange, Grier co-founded WomanKind in 2001, and served as executive director of the agency until 2006. Grier will be working together with Lisa Benfield, a nurse practitioner new to the Keys, who will be starting with WomanKind on December 10, 2007.

Grier has lived and worked in the Keys since 1989 in various roles, providing healthcare and health education to women and teens. She worked as a teen specialist in the Monroe County Schools, and started the original Monroe County Health Department teen clinic at the Roosevelt Sands Center on Olivia Street.

“Renee is the ultimate embodiment of the mission, vision and philosophy of WomanKind. She truly cares for the women she treats, and goes the extra mile to deliver exceptional care to all of her patients,” said current executive director, Betsy Langan. “We are thrilled to have her back on the WomanKind team!”

WomanKind’s mission is to provide safe and affordable women’s health care that is individualized, accessible, and prevention focused through the lifecycle. In addition to primary and gynecological care, WomanKind offers health education, mental health counseling, and a reduced-cost prescription service. For more information about services, volunteer or donor opportunities, or to schedule an appointment with Renee, please contact WomanKind’s office at 305-294-4004.
